Name: _____

Class: _____Date:_____

LESSON 5. MULTIPLICATION AND DIVISION OF NATURAL NUMBERS

1.39. Calculate mentally using the associative property of multiplication:

a) $23 \cdot 4$; b) $36 \cdot 25$; c) $125 \cdot 48$; d) $17 \cdot 8$.

_____

_____

1.40. Calculate mentally using the distributive property of multiplication over addition:

a) $87 \cdot 11$; b) $35 \cdot 12$.

_____

1.41. Calculate in a smart way, following the example:

$25 \cdot 19 = 25 \cdot (20 - 1) = 25 \cdot 20 - 25 \cdot 1 = 500 - 25 = 475$.

a) $35 \cdot 29$; b) $53 \cdot 98$; c) $25 \cdot 998$.

_____

_____

1.42. Calculate in a smart way:

a) $4 \cdot 17 \cdot 25 + 2 \cdot 46 \cdot 50 + 5 \cdot 37 \cdot 20$;

b) $35 \cdot 41 + 82 \cdot 20 + 15 \cdot 95 + 60 \cdot 50$.

_____

_____

_____

1.43. Lê did three divisions and the teacher marked all of them **wrong**. Lê's answers are shown below. Explain Lê's mistakes and give the correct answers.

Division	Lê's answer
539 : 7	quotient 77, remainder 2
1 364 : 19	quotient 70, remainder 34
323 : 8	quotient 4, remainder 3

1.44. A rectangle has a length of 18 cm and an area of a cm^2. Find the width of the rectangle (a natural number), given that a is a natural number from 230 to 240.

1.45. Suppose the keys [4], [5], [+] and [−] on your calculator are broken. Using the other keys, what can you press so that the screen shows a multiplication with the result 5 454?

1.46. a) Each kindergarten child gets one cake for an afternoon snack. The school has 458 children. How many boxes of cakes must be opened if each box has 12 cakes?

b) A 200-page notebook costs 14 thousand dong. With 250 thousand dong, what is the greatest number of these notebooks you can buy?

1.47. Compare without doing the multiplication:

a) $m = 27 \cdot 40$ and $n = 19 \cdot 60$;

b) $p = 2\,021 \cdot 2\,027$ and $q = 2\,024 \cdot 2\,024$.

1.48. Use the properties of addition and multiplication to calculate quickly:

a) $(2\,023 \cdot 2\,024 + 4\,046) : (2\,026 \cdot 2\,025 - 4\,052)$;

b) $(743 \cdot 615 - 286) : (614 \cdot 743 + 457)$.

1.49. The result of each multiplication below is one of the four options (A), (B), (C), (D) in the table. Find the correct option without doing the calculation in columns.

Multiplication	(A)	(B)	(C)	(D)
a) $842 \cdot 9$	7 578	8 578	6 573	17 578
b) $437 \cdot 398$	373 926	37 926	349 932	173 926

1.50. Compare without doing the calculation in columns:

a) $a = 46 \cdot 382$ and $b = 42 \cdot 386$;

b) $a = 34 \cdot 35\,351$ and $b = 35 \cdot 34\,341$.
