LESSON 15. RULES FOR REMOVING BRACKETS

Remove the brackets, then calculate the sums (Exercises 3.20 to 3.21):

3.20. a) (−36) + (−47) − 85 + (−72);

b) 24 − (−39) + (−58) − (+46).

_____

_____

3.21. a) (73 − 95) − (18 − 64 + 7);

b) 48 + (17 − 35) − (71 + 48).

_____

_____

Calculate in a smart way (Exercises 3.22 to 3.23):

3.22. a) 52 − 55 + 58 − 61 + 64 − 67;

b) 86 − (47 − 9) + (−48).

_____

_____

3.23. a) 457 − (318 + 457) − (82 + 0);

b) 425 − (713 + 325 − 488).

_____

_____

3.24. Calculate the sum of the elements of the set $M = \{x \in \mathbb{Z} \mid -25 \leq x < 25\}$.

_____

_____

3.25. Seven integers have this property: the sum of any three of them is always a negative integer. Explain why the sum of all seven integers is also a negative integer.

_____
