LESSON 3. ORDER IN THE SET OF NATURAL NUMBERS

1.22. Draw a number ray and mark the numbers 6 and 13 on it.

_____

_____

1.23. Which number does each point E, F, G in Figure 1.2 represent?

_____

1.24. On the road you see a kilometre post like the one in Figure 1.3. How many more kilometres must you travel to reach Sơn La? Draw a number ray to model National Highway 6 from post km0 to Sơn La: its origin is post km0; mark the point for post km125 and the point for Sơn La (the distances do not need to be exact).

Note: "km125" on the post means that this place is 125 km from the start of National Highway 6 (post km0).

_____

_____

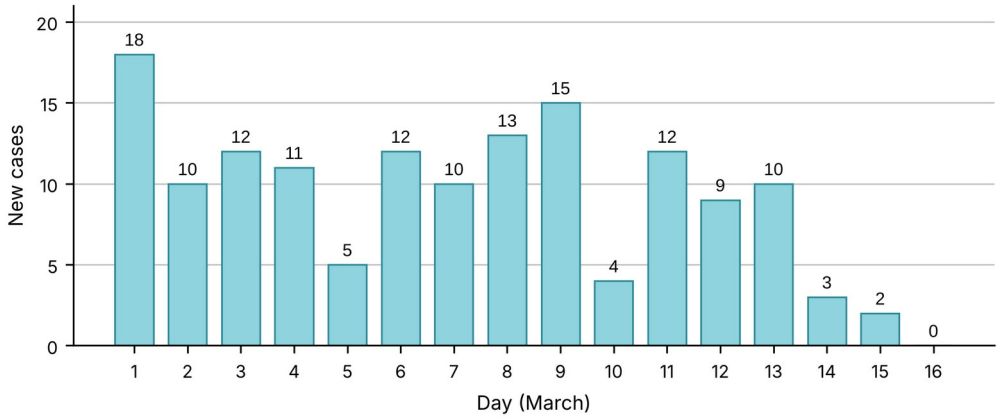

_____

1.25. Four points A, B, C, D lie on the same number ray in this order. They represent the four numbers 43 618; 43 529; 42 937 and 43 607. Which point represents which number?

_____

_____

1.26. A health centre recorded the number of new flu cases in a town each day from 1 March to 16 March, as shown in the chart below:

Imagine that the left side of the chart is a number ray showing the numbers 0; 5; 10; 15 and 20. The number on top of each column is the number of new cases on that day.

a) On which days were there 5, 10 and 15 new cases?

_____

_____

b) On which day were there the most new cases? On which day were there the fewest?

_____

c) Why can the health centre say: "The number of new cases has been going down in the last few days"?

_____

_____

1.27. Given four sets: $A = \{x \in \mathbb{N} \mid x \text{ is a multiple of 3 and } x < 12\}$, $B = \{x \in \mathbb{N} \mid x \text{ is a multiple of 3 and } x \leq 12\}$, $C = \{x \in \mathbb{N}^* \mid x \text{ is a multiple of 3 and } x < 12\}$ and $D = \{x \in \mathbb{N}^* \mid x \text{ is a multiple of 3 and } x \leq 12\}$. Write each set by listing its elements.

_____

_____

_____

_____

1.28. Given the set $P = \{\frac{1}{x} \mid x \in \mathbb{N}^* \text{ and } x \leq 5\}$. Write set P by listing its elements.

_____

_____
